

## EXPERIMENT-3

**Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS.**

**AIM:** To create and provide a cloud-based Property Buying and Rental System for Chennai City using Zoho Creator to demonstrate the Software as a Service (SaaS) model.

### PROCEDURE:

- 1) Open a web browser and log in to Zoho Creator using a valid Zoho account.
- 2) Click on Create App and select From Scratch → Blank App.
- 3) Enter the application name as Property Buying & Rental System – Chennai and create the app.
- 4) Create a new form named Property Details to store property information.
- 5) Add required fields such as Property Type, Purpose (Buy/Rent), Locality in Chennai, Price, and Contact Details.
- 6) Create another form named Customer Details to collect buyer or tenant requirements.
- 7) Add fields such as Customer Name, Requirement Type, Preferred Area, Budget, and Contact Number.
- 8) Create List Reports for Property Details and Customer Details to display records.
- 9) Configure user access and sharing settings to allow multiple users to access the application.
- 10) Generate the application URL and access the cloud-based Property Buying & Rental System through a web browser.

### OUTPUT:

The screenshot shows a web browser window with the URL [https://creatorapp.zoho.in/sandeepnallamalli/environment/development/property-buying/#Form:Property\\_details](https://creatorapp.zoho.in/sandeepnallamalli/environment/development/property-buying/#Form:Property_details). The page title is "Property Buying". The main content is a "Property details" form with the following fields and values:

Field	Value
Name *	Srinu
Phone number *	+91 9502387456
Property type *	Duplex
Area *	Nellore
Number of bedrooms *	4
Property cost *	90,00,000

A blue "Submit" button is at the bottom of the form. The left sidebar shows a navigation menu with "Property Details" selected. The status bar at the bottom shows the date and time as 18-12-2025.

The screenshot shows a web browser window displaying a Zoho Creator application titled "Property Buying". The main content area is titled "All Property Details" and contains a table with three rows of data. The columns are: Name, Phone number, Property type, Area, Number of bedrooms, and Property cost. The data is as follows:

Name	Phone number	Property type	Area	Number of bedrooms	Property cost
waleed	+913245163890	House	Kadapa	3	50,00,000
Teja	+915678904321	Flat	Buchi Reddy Palem	2	75,00,000
Srinu	+919502387456	Duplex	Nellore	4	90,00,000

The left sidebar has a dark theme with a navigation menu. The top bar includes standard browser controls and a trial status message: "Trial expires in 14 days". The bottom bar shows system icons and the date/time: "18-12-2025".

## RESULT:

A cloud-based Property Buying & Rental System for Chennai City was successfully created using Zoho Creator. Users can view property listings, enter customer requirements, and access the system through a web browser without installation, thereby successfully demonstrating the Software as a Service (SaaS) model.
